1.3 Availability of Local Funds

Attach a statement signed by the <u>Chief Financial Officer</u> listed in section 5.2 certifying <u>all local resources</u> required for the project will be available on or before the earliest date listed in the Project Schedule section. The OPWC Agreement will not be released until the local resources are certified. Failure to meet local share may result in termination of the project. Applicant needs to provide written confirmation for funds coming from other funding sources.

4.3 Project Description

A: SPECIFIC LOCATION (Supply a written location description that includes the project termini; a map does not replace this requirement.) 500 character limit.

Project is located in the existing below ground wastewater pump station at the north end of North Railroad St. next to Packer Creek (See attached map).

B: PROJECT COMPONENTS (Describe the specific work to be completed; the engineer's estimate does not replace this requirement) 1,000 character limit.

Following are the major items to be addressed by this project

- replace three (3) existing suction lift pumps and motors with new pumps and motors
- replace miscellaneous pump related items such as air release valves, gauges and piping
- replace check valves on discharge side of pumps
- replace obsolete variable frequency drives
- replace pump logic control panel
- replace primary level control bubbler system
- replace back-up level control float system
- replace access door to wetwell

C: PHYSICAL DIMENSIONS (Describe the physical dimensions of the existing facility and the proposed facility. Include length, width, quantity and sizes, mgd capacity, etc in detail.) 500 character limit.

Three (3) - 50 hp, 900gpm suction lift sewage pumps and motors

Three (3) - 480V, 3ph, Variable Frequency Drives (VFD's) for 50 hp motors

Pump control system including programmable logic control, level control, pump sequencing

Three (3) new 8" check valves, air release valves and pressure sensing gauges

Control room cooling to accomodate VFD's operating constraints

Bubbler type level sensing primary wetwell level control with float type back-up system

5.0 Project Officials

Changes in Project Officials must be submitted in writing from an officer of record.

5.1 Chief Executive Officer	(Person a	authorized in legislation to sign project agreements)

6.0 Attachments / Completeness review

Confirm in the boxes below that each item listed is attached (Check each box)

A certified copy of the legislation by the governing body of the applicant authorizing a designated Х official to sign and submit this application and execute contracts. This individual should sign under 7.0, Applicant Certification, below. A certification signed by the applicant's chief financial officer stating the amount of all local share X funds required for the project will be available on or before the dates listed in the Project Schedule section. If the application involves a request for loan (RLP or SCIP), a certification signed by the CFO which identifies a specific revenue source for repaying the loan also must be attached. Both certifications can be accomplished in the same letter. A registered professional engineer's detailed cost estimate and useful life statement, as required in lχl 164-1-13, 164-1-14, and 164-1-16 of the Ohio Administrative Code, Estimates shall contain an engineer's seal or stamp and signature. A cooperative agreement (if the project involves more than one subdivision or district) which identifies the fiscal and administrative responsibilities of each participant, Farmland Preservation Review - The Governor's Executive Order 98-IIV, "Ohio Farmland Protection Policy" requires the Commission to establish auidelines on how it will take protection of productive agricultural and grazing land into account in its funding decision making process. Piease include a Farm Land Preservation statement for projects that have an impact on farmland. Capital Improvements Report, CIR Required by O.R.C. Chapter 164,06 on standard form. Supporting Documentation: Materials such as additional project description, photographs, economic impact (temporary and/or full time jobs likely to be created as a result of the project), accident reports, impact on school zones, and other information to assist your district committee in ranking your project. Be sure to include supplements which may be required by your local District Public Works Integrating Committee.

7.0 Applicant Certification

The undersigned certifies: (1) he/she is legally authorized to request and accept financial assistance from the Ohio Public Works Commission as identified in the attached legislation; (2) to the best of his/her knowledge and belief, all representations that are part of this application are true and correct; (3) all official documents and commitments of the applicant that are part of this application have been duly authorized by the governing body of the applicant; and, (4) should the requested financial assistance be provided, that in the execution of this project, the applicant will comply with all assurances required by Ohio Law, including those involving Buy Ohio and prevailing wages.

Applicant certifies that physical construction on the project as defined in the application has NOT begun, and will not begin until a Project Agreement for this project has been executed with the Ohio Public Works Commission. Action to the contrary will result in termination of the agreement and withdrawal of Ohio Public Works Commission funding from the project.

ORDINANCE 26-2019

AN ORDINANCE AUTHORIZING THE VILLAGE ADMINISTRATOR, KEVIN M. GLADDEN, TO PREPARE AND SUBMIT AN APPLICATION TO PARTICIPATE IN THE OHIO PUBLIC WORKS COMMISSION STATE CAPITAL IMPROVEMENT AND/OR LOCAL TRANSPORTATION IMPROVEMENT PROGRAM (S) AND TO EXECUTE CONTRACTS AS REQUIRED, AND DECLARING AN EMERGENCY.

WHEREAS, the State Capital Improvement Program, and the Local Transportation Improvement Program both provide financial assistance to political subdivisions for Capital Improvements to public infrastructure; and.

WHEREAS, the Village of Genoa is planning to make capital improvements to the Wastewater Pumping Station.

NOW THEREFORE BE IT ORDAINED BY THE COUNCIL OF THE VILLAGE OF GENOA, OTTAWA COUNTY, OHIO:

SECTION 1. That the Village Administrator, Kevin M. Gladden, is hereby authorized to apply to the OPWC for funds described above. Located at 102 E 6th St, Genoa, Ohio 43430. 419-855-7791 ext. 1, 419-855-9994 fax, koladden@genoaohio.org.

SECTION 2. That the Village Administrator is further authorized to enter into agreements as may be necessary, and appropriate for obtaining this financial assistance.

SECTION 3. It is found and determined all formal actions of this Council concerning and relating to the adoption of this Ordinance were adopted in an open meeting of the Council, and that all deliberations of this Council or of any of its committees that resulted in such formal actions were in meetings open to the public in compliance with all legal requirements including Section 121.22 of the Ohio Revised Code.

Project Narrative

9th Street Pump Station Rehabilitation Village of Genoa

The Village of Genoa is pursing funding to assist with improvements to the 9th St Pump Station in the Village. Almost all sanitary sewer effluent (approx. 95%) generated in the Village and those areas outside of the Village, within the Village's Sanitary Sewer service area (includes; the Village of Clay Center, Genoa High School, Guardian Industries and those subdivisions adjacent to SR 51 north of the Village) are pumped by this pump station.

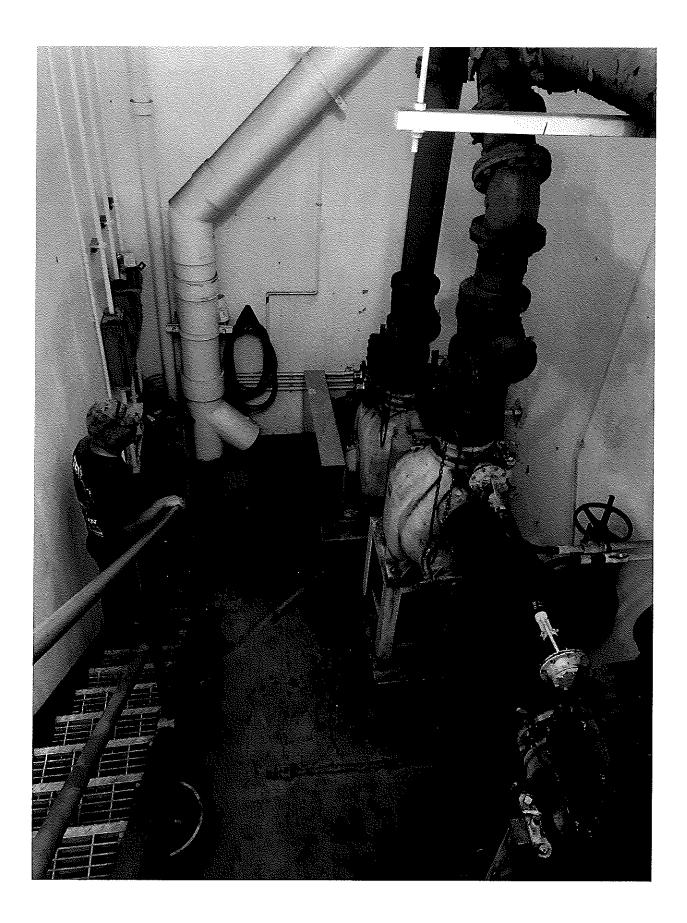

The existing pumps and controls were installed in the year 2000 and have reached the end of their useful life. The pumps originally pumped at a rate of 900 gpm but are now pumping at approximately 575 gpm (less than 65% of the design pumping rate) due to wear. In addition, the variable frequency drives are out of date and the Village has been informed that replacements are no longer being manufactured. A variable frequency drive for one of the pumps failed last year and the Village was fortunate to be able to buy a replacement only after an Internet search located a drive through a second hand source.

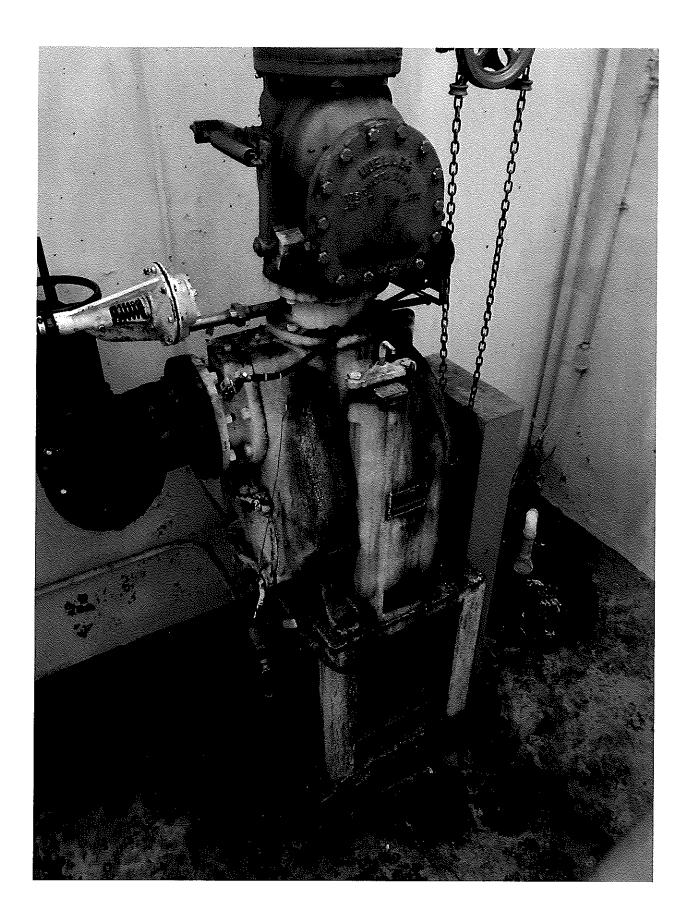

The Village is currently in the midst of making costly improvements to its wastewater treatment lagoons in order to comply with OEPA effluent limits and cannot afford to undertake this project without financial assistance. Therefore, the Village is requesting financial assistance of \$275,000 in OPWC grant funding and \$137,500 in Loan funds. The Village is prepared to proceed with the design of the project as soon as authorized and is planning to proceed with construction at the beginning of 2021.

RECORD OF ORDINANCES

ORDINANCE ESTABLISHING CURRENT WATER RATES AND TAP IN FEES FOR THE VILLAGE OF GENOA AND AMENDING ORDINANCE NO. 25-11; AND WATER METER COSTS TO REFLECT CURRENT PRICING AND CONDITIONS; AND DECLARING AN EMERGENCY.

WHEREAS, Village Council wishes to amend Ordinance No. 25-11, to reflect increased costs of purchases for the Water Distribution System,

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE VILLAGE OF GENOA, OTTAWA COUNTY, OHIO THAT:

SECTION 1. That the Council of the Village of Genoa, Ottawa County, Ohio does hereby increase tap in fees, and water meter costs effective January 22, 2019, and amends Ordinance No. 25-11, tap in fees and water meter costs as follows:

1000 gallons or less (increasing 5% each year \$11.50 $\frac{2020}{12.08}$ $\frac{3031}{12.68}$

All succeeding 1000 gallons (increasing 5% each year \$11.50

for 3 consecutive years)

 Permit Fees
 \$50.00

 Tap in Fee
 \$1,500.00

 Meter and installation
 \$200.00

 Water turn on
 \$50.00

 Frozen Meter
 \$200.00

Such charges shall become effective for all consumers of Genoa water system on January 22, 2019, and also those stated in subsection (A)(2), and (A)(3), below.

(2) All water used by Guardian Industries which is located at 24145 West Moline-Martin Road, Millbury, Ohio will be billed at (4.47) per 1000 gallons effective January 22, 2019.

Far 4,500 Gal=11.50

(3) The Ohio Turnpike Commission rate will be as follows:
First 2000 gallons or less, \$25.79, all succeeding 1000 gallons, \$5.79 per thousand, effective January 22, 2019. These established rates shall be subject to revision after reasonable notice by regular mail to the Ohio Turnpike Commission.

SECTION 2. It is found and determined that all formal actions of council concerning or relating to the passage of this Ordinance were adopted in an open meeting of the Council, and that all deliberations of this Council and any of its committees, that resulted in such formal actions, were in meetings open to the public in compliance with all legal requirements of the Village of Genoa and Section 121.22 of the Ohio Revised Code.

RECORD OF ORDINANCES

Ordinance No.	 Pass	sed	20	

ORDINANCE NO. 72-2017

ORDINANCE INCREASING WATER CHARGES (EXHIBIT A) TO REFLECT A COST INCREASE FROM THE CITY OF OREGON, OHIO, IMPOSING A CAPITAL IMPROVEMENT CHARGE FOR THE OREGON WATER TREATMENT PLANT, HARMFUL ALGAE BLOOM INFRASTRUCTURE IMPROVEMENT PROJECT; AND DECLARING AN EMERGENCY

WHEREAS, the City of Oregon, Ohio has determined that it is necessary to construct a Water Treatment Plant (WTP) Harmful Algae Bloom (HAB) Infrastructure Improvements Project in order to destroy microsystem toxins, reduce disinfection byproducts and improve water taste and odor; and

WHEREAS, the cost of this project is funded with a \$1.4 million grant and 0% interest loan through the Ohio EPA; and

WHEREAS, in order to repay for the project, the City of Oregon has increased their charges to water users as outlined in Exhibit A attached hereto,

BE IT ORDAINED BY THE COUNCIL OF THE VILLAGE OF GENOA:

SECTION 1. That to pay for a cost increase in the Village of Genoa, Ottawa County, Ohio, that is being assessed by the City of Oregon, Ohio to construct the Oregon Water Treatment Plant (WTP) Harmful Algae Bloom (HAB) Infrastructure Improvements Project, water users shall be charged an additional amount as provided hereinafter and listed below:

Gallons Used	Cost
0-7500	\$2.00
7500 - 15,000	\$4.00
15,000 - 25,000	\$6.00
Over 25,000	\$2.00 per 7,500 gallon

SECTION 2. That is it found and determined that, to the extent required by law, all formal actions of this Council concerning and relating to the adoption of this ordinance were adopted in an open meeting of the Council, and that all deliberations of this Council and of any its committees that resulted in such formal action, were in meetings open to the public, in compliance with all legal requirements of the Village of Genoa and the State of Ohio.

	%?	(Use	dollar	amounts	of proje	et to	figure	percentages	and	make	sure	the	total	equals	one
	hundred	l(100) r	percent) A+B=_	% C+)=_	%								

Repair/Replacement - Repair or Replacement of public facilities owned by the government (any subdivision of the state).

New/Expansion = Replacement of privately owned wells, septic systems, private water or wastewater systems, etc.

2. Give the physical condition rating:

Critical:

Poor:

The condition is unusable, dangerous and unsafe. The primary components Closed or Not Operating: have failed. The infrastructure is not functioning at all.

The condition is causing or contributing to a serious non-compliance situation and is threatening the intended design level of service. The infrastructure is functioning at seriously diminished capacity. Imminent failure is anticipated within 18 months. Repair and/or replacement is required to eliminate the critical condition and meet current design standards. (For Road Projects structural repair items would represent a minimum

of 25% of the total Project Cost).

The condition is substandard and requires repair/replacement in order to

return to the intended level of service and comply with current design standards. Infrastructure contains a major deficiency and is functioning at a

diminished capacity.

The condition is average, not good or poor. The infrastructure is still Fau:

> functioning as originally intended. Minor deficiencies exist requiring repair to continue to function as originally intended and/or to meet current design

standards.

The condition is safe and suitable to purpose. Infrastructure is functioning as Good:

originally intended, but requires minor repairs and/or upgrades to meet current design standards.

Excellent:

The condition is new, or requires no repair. Or, no supporting documentation

has been submitted.

- * In order to receive points provide supporting documentation (e.g. photos, a narrative, maintenance history, or third party findings) to justifying the rating.
- 3. If the proposed project is not approved what category would best represent the impact on the general health and/or public safety?

ROADS

Extremely Critical:

Resurfacing, Restoration, Rehabilitation and Reconstruction (4R) of a Major

Access Road.*

Critical:

Resurfacing, Restoration and Rehabilitation (3R) of a Major Access Road.*

Major:

Resurfacing, Restoration, Rehabilitation and Reconstruction (4R) of a Minor

Access Road.*

Moderate:

Resurfacing, Restoration and Rehabilitation (3R) of a Minor Access Road.*

Minimal:

Preventative Maintenance of a Major Access Road.

No Impact:

Preventative Maintenance of a Minor Access Road.

Projects that have a variety of work will be scored in the <u>LOWEST</u> category of work contained in the Construction Estimate.

Road/Street Classifications:

Major Access Road:

Roads or streets that have a dual function of providing

access to adjacent properties and providing through or

connecting service between other roads.

Minor Access Road:

Roads or streets that primarily provide access to adjacent

properties without through continuity, such as cul-de-sacs

or loop roads or streets.

Preventative Maintenance:

Non Structural Pavement work such as chip sealing, cape

sealing, micro-surfacing, crack sealing, etc.

^{*(3}R) Resurfacing, Restoration and Rehabilitation - Improvements to existing roadways, which have as their main purpose, the restoration of the physical features (pavement, curb, guardrail, etc.) without altering the original design elements. (Surface and Intermediate layer Mill and Fills, overlays with less than or equal to 3" of additional pavement, ect...)

*(4R) Resurfacing, Restoration, Rehabilitation and Reconstruction - Much like 3R, except that 4R allows for the complete reconstruction of the roadway and alteration of certain design elements (i.e., lane widths, shoulder width, SSD, overlays with greater than 3" of additional pavement, etc.).

BRIDGES SUFFICIENCY RATING

Extremely Critical: 0-25, or a General Appraisal rating of 3 or less.

Critical: 27-50, or a General Appraisal rating of 4.

Major: 51-65 or a General Appraisal rating of 5 or 6.

Moderate: 66-80 or a General Appraisal rating of 7.

Minimal: 81-100 or a General Appraisal rating of more than 7.

No Impact: Bridge on a new roadway.

WASTEWATER TREATMENT PLANTS

Extremely Critical: Environmental Protection Agency (EPA) orders in the form of a consent decree,

findings and orders or court order. Health Department Construction Ban.

Critical: Improvements ordered by the Environmental Protection Agency (EPA) in the

form of NPDES Orders.

Major: Replace deficient appurtenances. Update existing processes due to EPA

recommendations.

Moderate: Increase capacity to meet current needs or update processes to improve effluent

quality.

Minimal: New/Expansion project to meet a specific development proposal.

No Impact: New/Expansion to meet future or projected needs.

WATER TREATMENT PLANT

Extremely Critical: EPA orders in the form of a consent decree, findings and orders or court order.

Critical: Improvements to meet Environmental Protection Agency (EPA) Safe Drinking

Water Regulations and/or NPDES Orders.

Major: Replace deficient appurtenances. Update existing processes due to EPA

recommendations.

Moderate: Increase capacity to meet current needs or update processes to improve water

quality.

Minimal: New/Expansion project to meet a specific development proposal.

No Impact:

New/Expansion to meet future or projected needs.

COMBINED SEWER SEPARATIONS (May be construction of either new storm or sanitary sewer as long as the result is two separate sewer systems.)

Extremely Critical: EPA orders in the form of a consent decree, findings and orders or court order.

Health Department Construction Ban.

Critical:

Separate, due to chronic backup or flooding in basements.

Major:

Separate, due to documented water quality impairment, or due to EPA

recommendations.

Moderate:

Separate, due to specific development proposal within or upstream of the

combined system area.

Minimal:

Separate, to conform to current design standards.

No Impact:

No positive health effect.

STORM SEWERS

Extremely Critical:

EPA orders in the form of a consent decree, findings and orders or court order.

Critical:

Chronic flooding (structure damage).

Major:

Inadequate capacity (land damage).

Moderate:

Inadequate capacity with no associated damage.

Minimal:

New/Expansion to meet current needs.

No Impact:

New/Expansion to meet future or project needs.

CULVERTS

Extremely Critical:

Structurally deficient or functionally obsolete. Deterioration has already caused a

safety Critical: hazard to the public.

Critical:

Inadequate capacity with land damage and the existing or high probability of

property damage.

Major:

Inadequate capacity (land damage).

Moderate:

Inadequate capacity with no associated damage.

Minimal:

New/Expansion to meet current needs.

No Impact:

New/Expansion to meet future or projected needs.

SANITARY SEWERS

Extremely Critical: EPA orders in the form of a consent decree, findings and orders or court order,

Health Department Construction Ban.,

Critical: Replace, due to chronic pipe failure, chronic backup or flooding in basements.

Improvements ordered by the Environmental Protection Agency (EPA) in the

form of NPDES Orders.

Major: Replace, due to inadequate capacity or infiltration, or due to EPA

recommendations.

Moderate: Rehabilitate to increase capacity to meet current needs or to reduce inflow and

infiltration.

Minimal: New/Expansion project to meet a specific development proposal.

No Impact: New/Expansion to meet future or projected needs.

SANITARY LIFT STATIONS AND FORCE MAINS

Extremely Critical: Structurally deficient. Deterioration has already caused a safety/health hazard to

the public, or, EPA orders in the form of a consent decree, findings and orders or

court order.

Critical: Inadequate capacity with actual or a high probability of property damage.

Improvements ordered by the Environmental Protection Agency (EPA) in the

form of NPDES Orders.

Major: EPA recommendations, or, reduces a probable health and/or safety problem.

Moderate: Rehabilitate to increase capacity to meet current needs.

Minimal: New/Expansion to meet a specific development proposal.

No Impact: New/Expansion to meet future or projected needs.

WATER PUMP STATIONS

Extremely Critical: Structurally deficient. Deterioration has already caused a safety hazard to the

public, or, EPA orders in the form of a consent decree, findings and orders or

court order.

Critical: Inadequate capacity with the inability to maintain pressure required for fire flows.

Major: Replace due to inadequate capacity or EPA recommendations.

Moderate:	Rehabilitate to increase capacity to meet current needs.									
Minimal:	New/Expansion to meet a specific development proposal.									
No Impact:	New/Expansion to meet future or projected needs.									
WATER LINES/	WATER TOWERS									
Extremely Critica	al: Solve low water pressure or excessive incidents of main breaks in project area									
Critical:	Replace, due to deficiency such as excessive corrosion, etc.									
Major:	Replace undersized water lines as upgrading process.									
Moderate:	Increase capacity to meet current needs.									
Minimal:	New/Expansion project to meet a specific development proposal.									
No Impact:	New/Expansion to meet future or projected needs.									
<u>OTHER</u>										
Extremely Critica	l: There is a present health and/or safety threat.									
Critical:	The project will provide immediate health and/or safety benefit.									
Major:	The project will reduce a probable health and/or safety problem.									
Moderate:	The project will delay a health and/or safety problem.									
Minimal:	A possible future health and/or safety problem mitigation.									
No Impact:	No health and/or safety effect.									
in t In s	Combined projects that can be rated in more than one subset may be rated in the other category at the discretion of the District 5 Executive Committee. In general, the majority of the cost or scope of the project shall determine the categor under which the project will be scored.									
(Submittals with	out supporting documentation will receive 0 Points for this question.)									

(Additional narrative, charts and/or pictures should be attached to questionnaire)

your answer.

If the proposed project is funded, will its completion directly result in the creation of permanent full-time

7.

equivalent (FTE) jobs (FTE jobs shall be defined as 35 hours/week)? Yes ____ No _X_. If yes, how many jobs within eighteen months? ___ Will the completed project retain jobs that would otherwise be permanently lost? Yes ____ No _X_. If yes, how many jobs ____ will be created/retrained within 18 months following the completion of the improvements?

(Supporting documentation in the form of letter from affected industrial or commercial enterprises that specify full time equivlent jobs that will be retained or created directly by the installation or improvement of Public infrastructure. Additional items such as; 1) newspaper articles or other media news accounts, 2) public meeting minutes, and/or 3) a letter from the County Economic Development Director or State of Ohio Economic Development Professional that alludes to the requirement for the infrastructure improvement to support the business. Submittals without supporting documentation will receive 0 points for this question.)

- 8. What is the total number of existing users that will directly benefit from the proposed project if completed? 1200 (Use households served, traffic counts, etc. and explain the basis by which you arrived at your number.) Number of services that flow to the pump station
- 9. Is subdivision's population less than 5,000 Yes X No _____

 If yes, continue. You may want to design your project per Small Government Project Evaluation

 Criteria, released for the current OPWC Round to assist in evaluating your project for potential Small Government Funding. The Small Government Criteria is available on the OPWC website at http://www.pwc.state.oh.us/Meth.SG.PDF If No, skip to Question 11.

10. OHIO PUBLIC WORKS COMMISSION SMALL GOVERNMENT PROGRAM GUIDELINES

All projects that are sponsored by a subdivision with a population of 5,000 or less, and not earning enough points for District Funding from SCIP or LTIP Funds, are then rated using the Small Government Program Rating Criteria for the corresponding funding round. In order to be rated the entity must submit the Small Government Suppliment and their required budgets with their application.

Only infrastructure that is village- or township- owned is eligible for assistance. The following policies have been adopted by the Small Government Commission:

- •District Integrating Committees may submit up to seven (7) applications for consideration by the Commission. All 7 must be ranked, however, only the top five (5) will be scored. The remaining two (2) will be held as contingency projects should an application be withdrawn.
- Grants are limited to \$500,000. Any assistance above that amount must be in the form of a loan.

- •Grants for new or expanded infrastructure cannot exceed 50% of the project estimate.
- The Commission may deny funding for water and sewer systems that are deemed to be more cost-effective if regionalized.
- •If a water or sewer project is determined to be affordable, the project will be offered a loan rather than a grant. Pay special attention to the Water & Wastewater Affordability Supplemental and the Small Government Water & Wastewater Affordability Calculation Worksheet. Both are available on the Small Government Program Tab at http://www.pwc.state.oh.us/SmallGovernment.html
- Should there be more projects that meet the "annual score" than there is funding, the tie breaker is those projects which scored highest under Health & Safety, with the second tie breaker being Condition. If multiple projects have equivalent Health & Safety and Condition scores they are arranged according to the amount of assistance from low to high. Once the funded projects are announced, "contingency protects" may be funded from project under-runs by continuing down the approved project list.
- Supplemental assistance is not provided to projects previously funded by the Commission.
- •Applicants have 30 days from receipt of application by OPWC without exception to provide additional documentation to make the application more competitive under the Small Government criteria. Applications will be scored after the 30-day period has expired. The applicants for each District's two (2) contingency projects will have the same 30-day period to submit supplemental information but these applications will not be scored unless necessary to do so. It is each applicant's responsibility for determining the need for supplemental material. The applicant will not be asked for or notified of missing information unless the Commission has changed the project type and it affects the documentation required. Important information may include, but is not limited to: age of infrastructure, traffic counts or utility users, median income information, user rates ordinances, and the Auditor's Certificate of Estimated Revenues or documentation from the Auditor of State that subdivision is in a state of fiscal emergency.

If you desire to have your Round 33 project considered for Small Government Funding please download the Small Government Evaluation Criteria applicable to Round 33 by accessing the OPWC Website at http://www.pwc.state.oh.us/Meth.SG.PDF. Please complete the Small Government Evaluation Criteria and attach all required supporting documentation and attach it to the District 5 Questionnaire for Round 32.
