### 4.3 Project Description

A: SPECIFIC LOCATION (Supply a written location description that includes the project termini; a map does not replace this requirement.) 500 character limit. The water tower is located located West of the village at the intersection of Lawrence and Inman St. B: PROJECT COMPONENTS (Describe the specific work to be completed; the engineer's estimate does not replace this requirement) 1,000 character limit. The village was advised through the Ohio EPA to do upgrades on their Water Tower The old tower can not be repainted, and there is rust and pitting throughout the steel structure. The project will involve constructing a new tower to replace the existing tower. The existing tower will be removed. C: PHYSICAL DIMENSIONS (Describe the physical dimensions of the existing facility and the proposed facility. Include length, width, quantity and sizes, mgd capacity, etc. in detail.) 500 character limit. 100,000 gallon water tower, 300' of water line, demolition of a water tower

### 6.0 Attachments / Completeness review

Confir	n in the boxes below that each item listed is attached (Check each box)
$\checkmark$	A certified copy of the legislation by the governing body of the applicant authorizing a designated official to sign and submit this application and execute contracts. This individual should sign under 7.0, Applicant Certification, below.
<b>✓</b>	A certification signed by the applicant's chief financial officer stating the amount of <u>all local share</u> funds required for the project will be available on or before the dates listed in the Project Schedule section. If the application involves a request for loan (RLP or SCIP), a certification signed by the CFO which identifies a specific revenue source for repaying the loan also must be attached. Both certifications can be accomplished in the same letter.
<b>V</b>	A registered professional engineer's detailed cost estimate and useful life statement, as required in 164-1-13, 164-1-14, and 164-1-16 of the Ohio Administrative Code. Estimates shall contain an engineer's seal or stamp and signature.
	A cooperative agreement (if the project involves more than one subdivision or district) which identifies the fiscal and administrative responsibilities of each participant.
	Farmland Preservation Review - The Governor's Executive Order 98-IIV, "Ohio Farmland Protection Policy" requires the Commission to establish guidelines on how it will take protection of productive agricultural and grazing land into account in its funding decision making process. Please include a Farm Land Preservation statement for projects that have an impact on farmland.
$\checkmark$	Capital Improvements Report, CIR Required by O.R.C. Chapter 164,06 on standard form.
<b>V</b>	Supporting Documentation: Materials such as additional project description, photographs, economic impact (temporary and/or full time jobs likely to be created as a result of the project), accident reports, impact on school zones, and other information to assist your district committee in ranking your project. Be sure to include supplements which may be required by your local District Public Works Integrating Committee.

# 7.0 Applicant Certification

The undersigned certifies: (1) he/she is legally authorized to request and accept financial assistance from the Ohio Public Works Commission as identified in the attached legislation; (2) to the best of his/her knowledge and belief, all representations that are part of this application are true and correct; (3) all official documents and commitments of the applicant that are part of this application have been duly authorized by the governing body of the applicant; and, (4) should the requested financial assistance be provided, that in the execution of this project, the applicant will comply with all assurances required by Ohio Law, including those involving Buy Ohio and prevailing wages.

Applicant certifies that physical construction on the project as defined in the application has NOT begun, and will not begin until a Project Agreement for this project has been executed with the Ohio Public Works Commission. Action to the contrary will result in termination of the agreement and withdrawal of Ohio Public Works Commission funding from the project.

Subject:

AUTHORIZE APPLICATION TO THE OHIO PUBLIC WORKS

COMMISSION FOR FUNDING FOR WATER TOWER RECONSTRUCTION PROJECT IN THE VILLAGE

Date:

August 26, 2019

Resolution Number 9-08-02

WHEREAS, the State of Ohio, through the Ohio Public Works Commission, administers financial assistance for local communities for improvement of their basic infrastructure system.

WHEREAS, the village of Sherwood desires financial assistance under the State of Ohio Public Works Commission.

NOW THEREFORE, be it resolved by the village of Sherwood as follows:

#### SECTION ONE

That the village of Sherwood approves filing an application for the State of Ohio Public Works Commission.

#### **SECTION TWO**

That the Mayor is hereby authorized and directed to execute contracts with the Public Works Commission and file an application with Ohio Public Works Commission and to provide all information and documentation required to become eligible for possible funding assistance.

#### SECTION THREE

That the village of Sherwood does agree to obligate the funds required to satisfactorily complete the proposed project under the terms and conditions of the State of Ohio Public Works Commission.

Passed this 26th day of August 2019.

Attest:

Dawn Buskirk, Fiscal Officer

Cary Mallette, Mayor

#### CERTIFICATION OF RECORDING OFFICER

I, the undersigned, hereby certify that the foregoing is a true and correct copy of the resolution adopted by the Council of the village of Sherwood on the 26<sup>th</sup> day of August 2019, and that I am duly authorized to execute this certificate.

Dawn Buskirk, Fiscal Officer

Cary Mallette, Mayor

#### CHIEF FINANCIAL OFFICER'S CERTIFICATION OF LOCAL FUNDS

August 28, 2019

I, Dawn Buskirk, Fiscal Officer of the Village of Sherwood, hereby certify that the Village of Sherwood will have the amount of \$401,000.00 in the Water Fund, General Fund, CDBG Funds, and OEPA Funding and that this amount will be used to pay the local share when requested for the Water Tower Improvement Project.

Dawn Buskirk, Fiscal Officer

#### CHIEF FINANCIAL OFFICER'S CERTIFICATION OF LOAN REPAYMENT

August 28, 2019

I, Dawn Buskirk, Fiscal Officer of the Village of Sherwood, hereby certify that the Village of Sherwood will have the amount of \$ 249,500 in the Water Fund or General Fund and that this amount will be used to pay the SCIP or RLP loan when requested for the Water Tower Improvements Project over a 30 year term.

Dawn Buskirk, Fiscal Officer

**RESOLUTION 10-12-05** 

A Resolution of Approval to approve temporary utility billing rates for certain

commercial customers and to establish a "vacation billing rate" for all

customers

WHEREAS, the Council of the Village of Sherwood has previously passed an

Ordinance 07-11-04 to set the water and sewer billing rates for all residential and

commercial customers to be effective January 1, 2008 and which is still in effect;

And WHEREAS, Ordinance 07-11-04 did not establish any other special rates to be

applied to vacant properties and garage rates;

And WHEREAS, there are several commercial customers now being billed at

residential rates and various agreed upon rates;

And WHEREAS, there are several customers being billed at a vacation rate;

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE VILLAGE OF

SHERWOOD, OHIO, AS FOLLOWS:

Section 1: The attached specific list of existing and new utility customers will be

temporarily billed in accordance with the current billing rates until such a time as

to have meters installed at which time they will be billed in accordance with the

existing rate structure for commercial entities.

Section 2: Upon notification to the Village by the property owner of a vacancy for

a particular month, a rate of \$5.00 for water and \$5.00 for sewer is hereby

established.

## ORDINANCE NO. <u>07-/1-04</u>

#### AN ORDINANCE CHANGING WATER RATES AND SEWER RATES

WHEREAS, the Village of Sherwood, Ohio operates and maintains a public water distribution system and sanitary sewer system; and

WHEREAS, the Village of Sherwood, Ohio desires to modify its water rates and sewer rates,

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE VILLAGE OF SHERWOOD, OHIO, AS FOLLOWS:

SECTION 1: The prices to be charged for water and sewer furnished by the Village of Sherwood to all consumers within the village are hereby fixed at the rates set forth on the schedule attached hereto.

SECTION 2: This ordinance and the rate changes made herein shall take effect January 1, 2008.

MAYOR

Re:

Sherwood Village Inspection Letter of Compliance Drinking Water Program

Defiance County
PWS ID: OH2000712

September 21, 2017

Ms. Sherri Ramey 200 North Harrison Street Sherwood, Ohio 43556

Subject: Sanitary Survey - Facility ID# 2053834, COMM

Dear Ms. Ramey:

On August 22, 2017, I conducted a sanitary survey of the Sherwood Village public water system. You and Water Superintendent, Jeff Hurtig, were interviewed and the water system was inspected in your presence. The purpose of this evaluation was to determine the ability of the facility to provide adequate, safe and potable water that meets the requirements of the Ohio Administrative Code(OAC). The eight major elements that are generally reviewed during a sanitary survey include: source, treatment, distribution system, finished water storage, pumps/pump facilities and controls, monitoring/reporting/data verification, water system management/operation and operator compliance with State requirements. General supervision of the operation and maintenance of public water systems is a function of this Agency as set forth in Chapter 6109 of the Ohio Revised Code(ORC).

#### **DETAILED MONITORING EVALUATION**

As required in OAC 3745-81-51, a detailed monitoring evaluation (DME) was performed to determine whether your system is on the appropriate routine total coliform monitoring schedule. Based on the information reported during the visit, it was determined that Sherwood Village may continue with your current monitoring schedule. This means you must continue to collect a minimum of one total coliform sample each month.

#### RECOMMENDATIONS

The recommendations set out below are NOT Orders. The recommendations are offered by Ohio EPA in effort to provide compliance assistance to your facility.

- 1.A master plan showing proposed upgrades/improvements of the water system infrastructure (i.e. 5 year plan) should be developed. Assistance is available through the Ohio Rural Community Assistance Program (Ohio RCAP). Information on services offered by Ohio RCAP is available on their website at http://ohrcap.org/.
- 2.Treatment should be installed to reduce secondary contaminants in present source water, including: iron, manganese, hardness and sulfate. Plans for a treatment system were approved on August 12, 2010, but the approval has expired. Current plan approval is required.

Ms. Sherri Ramey September 21, 2017 Page 2

- 3. Secondary spill containment for liquid chemical storage areas is recommended. (Recommended Standards for Water Works (RSWW), Section 5.1.9(d)(2)).
- 4. The water rates are below 1.3% of the median household income of the service area based on an average use of 7,756 gallons per month. Assistance is available through Ohio RCAP to evaluate your water rates.
- 5. The paint on the water tower is peeling and the tower is corroding. The tower appears to be beyond its useful life, and the village should plan to replace it.
- 6.Residential connections are not metered. Installing water meters at all service connections will allow the village to accurately charge customers for water use and to aid in water accountability. Tools for tracking non-revenue water are available from Ohio RCAP
- 7.Consider implementing a valve exercising program including at least the following elements: goal of annual exercising, measures to verify the goals are met, written standard operating procedures, written records of the exercising including date, number of turns, and person completing the work, identification of critical valves for exercising on a more frequent basis, and goals to reduce the number of inoperable valves (AWWA Standard G200-04, 4.2.5.1).
- 8. Consider updating and improving distribution drawings for the village by geo-locating all water lines, valves, hydrants and curb stops.
- 9. Consider installing fencing around the elevated towers and water treatment plant to improve public safety and water system security.
- A Source Water Protection Plan (SWAP) should be implemented. Contact Richard Kroeger, SWAP Coordinator, DDAGW, NWDO at (419) 373-4101 with any questions regarding the Source Water Protection Plan.

Please note that any modifications to your well, treatment system or distribution system may require prior plan approval. Please contact me if you plan on making any changes.

Additional information concerning existing and upcoming drinking water regulations and requirements can be obtained from our website at www.epa.ohio.gov/ddagw.

If you have any questions regarding this letter, or any other matter involving your water system, please feel free to contact me by email at <u>elizabeth.ames@epa.ohio.gov</u> or by phone at (419) 373-3107.

Sincerely

Elizabeth Ames

# DISTRICT 5 CAPITAL IMPROVEMENT PROJECTS QUESTIONNAIRE ROUND 34

Name of Applicant: VIII	998 of Sterwood
Project Title:	ATER TOWER IMPROVEMENTS
Projects. Please provide specific responses to these questions will	be answered for each application submitted for State Issue II SCIP, LTIP and Loan information using the best documentation available to you. Justification of your be required if your project is selected for funding, so please provide correct and es and Townships under 5,000 in population should also complete the Small
1. What percentage of the pr	roject in repair A= 60%, replacement B=%, expansion C=%, and new D=
%? (Use dollar am	ounts of project to figure percentages and make sure the total equals one
hundred(100) percent) A-	+B= <u>100</u> % C+D=%
	pair or Replacement of public facilities owned by the government (any subdivision the state).
	placement of privately owned wells, septic systems, private water or wastewater tems, etc.
2. Give the physical condition	on rating:
Closed or Not Operating:	The condition is unusable, dangerous and unsafe. The primary components have failed. The infrastructure is not functioning at all.
Critical:	The condition is causing or contributing to a serious non-compliance situation and is threatening the intended design level of service. The infrastructure is functioning at seriously diminished capacity. Imminent failure is anticipated within 18 months. Repair and/or replacement is required to eliminate the critical condition and meet current design standards. (For Road Projects structural repair items would represent a minimum of 25% of the total Project Cost).
Poor:)	The condition is substandard and requires repair/replacement in order to return to the intended level of service and comply with current design standards. Infrastructure contains a major deficiency and is functioning at a diminished capacity.
Fair:	The condition is average, not good or poor. The infrastructure is still functioning as originally intended. Minor deficiencies exist requiring repair to continue to function as originally intended and/or to meet current design standards.

The condition is safe and suitable to purpose. Infrastructure is functioning as

Good:

originally intended, but requires minor repairs and/or upgrades to meet current design standards.

Excellent:

The condition is new, or requires no repair. Or, no supporting documentation has been submitted.

- \* In order to receive points provide supporting documentation (e.g. photos, a narrative, maintenance history, or third party findings) to justifying the rating.
- 3. If the proposed project is not approved what category would best represent the impact on the general health and/or public safety?

Minimal: Preventative Maintenance of a Major Access Road.

No Impact: Preventative Maintenance of a Minor Access Road.

Projects that have a variety of work will be scored in the <u>LOWEST</u> category of work contained in the Construction Estimate.

Road/Street Classifications:

Major Access Road: Roads or streets that have a dual function of providing

access to adjacent properties and providing through or

connecting service between other roads.

Minor Access Road: Roads or streets that primarily provide access to adjacent

properties without through continuity, such as cul-de-sacs

or loop roads or streets.

Preventative Maintenance: Non Structural Pavement work such as chip sealing, cape

sealing, micro-surfacing, crack sealing, etc.

\*(3R) Resurfacing, Restoration and Rehabilitation - Improvements to existing roadways, which have as their main purpose, the restoration of the physical features (pavement, curb, guardrail, etc.) without altering the original design elements. (Surface and Intermediate layer Mill and Fills, overlays with less than or equal to 3" of additional pavement, ect...)

\*(4R) Resurfacing, Restoration, Rehabilitation and Reconstruction - Much like 3R, except that 4R allows for the complete reconstruction of the roadway and alteration of certain design elements (i.e., lane widths, shoulder width, SSD, overlays with greater than 3" of additional pavement, etc.).

#### **BRIDGES SUFFICIENCY RATING**

Extremely Critical:

0-25, or a General Appraisal rating of 3 or less.

Critical:

27-50, or a General Appraisal rating of 4.

Major:

51-65 or a General Appraisal rating of 5 or 6.

Moderate:

66-80 or a General Appraisal rating of 7.

Minimal:

81-100 or a General Appraisal rating of more than 7.

No Impact:

Bridge on a new roadway.

#### **WASTEWATER TREATMENT PLANTS**

Extremely Critical:

Environmental Protection Agency (EPA) orders in the form of a consent decree,

findings and orders or court order. Health Department Construction Ban.

Critical:

Improvements ordered by the Environmental Protection Agency (EPA) in the

form of NPDES Orders.

Major:

Replace deficient appurtenances. Update existing processes due to EPA

recommendations.

Moderate:

Increase capacity to meet current needs or update processes to improve effluent

quality.

Minimal:

New/Expansion project to meet a specific development proposal.

No Impact:

New/Expansion to meet future or projected needs.

#### WATER TREATMENT PLANT

Extremely Critical:

EPA orders in the form of a consent decree, findings and orders or court order.

Critical:

Improvements to meet Environmental Protection Agency (EPA) Safe Drinking

Water Regulations and/or NPDES Orders.

Major:

Replace deficient appurtenances. Update existing processes due to EPA

recommendations.

Moderate:

Increase capacity to meet current needs or update processes to improve water

quality.

Minimal:

New/Expansion project to meet a specific development proposal.

No Impact:

New/Expansion to meet future or projected needs.

COMBINED SEWER SEPARATIONS (May be construction of either new storm or sanitary sewer as long as the result is two separate sewer systems.)

Extremely Critical: EPA orders in the form of a consent decree, findings and orders or court order.

Health Department Construction Ban.

Critical:

Separate, due to chronic backup or flooding in basements.

Major:

Separate, due to documented water quality impairment, or due to EPA

recommendations.

Moderate:

Separate, due to specific development proposal within or upstream of the

combined system area.

Minimal:

Separate, to conform to current design standards.

No Impact:

No positive health effect.

#### STORM SEWERS

Extremely Critical:

EPA orders in the form of a consent decree, findings and orders or court order.

Critical:

Chronic flooding (structure damage).

Major:

Inadequate capacity (land damage).

Moderate:

Inadequate capacity with no associated damage.

Minimal:

New/Expansion to meet current needs.

No Impact:

New/Expansion to meet future or project needs.

#### CULVERTS

Extremely Critical:

Structurally deficient or functionally obsolete. Deterioration has already caused a

safety Critical: hazard to the public.

Critical:

Inadequate capacity with land damage and the existing or high probability of

property damage.

Major:

Inadequate capacity (land damage).

Moderate:

Inadequate capacity with no associated damage.

Minimal:

New/Expansion to meet current needs.

No Impact:

New/Expansion to meet future or projected needs.

#### SANITARY SEWERS

Extremely Critical:

EPA orders in the form of a consent decree, findings and orders or court order.

Health Department Construction Ban.

Critical:

Replace, due to chronic pipe failure, chronic backup or flooding in basements.

Improvements ordered by the Environmental Protection Agency (EPA) in the

form of NPDES Orders.

Major:

Replace, due to inadequate capacity or infiltration, or due to EPA

recommendations.

Moderate:

Rehabilitate to increase capacity to meet current needs or to reduce inflow and

infiltration.

Minimal:

New/Expansion project to meet a specific development proposal.

No Impact:

New/Expansion to meet future or projected needs.

#### SANITARY LIFT STATIONS AND FORCE MAINS

Extremely Critical:

Structurally deficient. Deterioration has already caused a safety/health hazard to

the public, or, EPA orders in the form of a consent decree, findings and orders or

court order.

Critical:

Inadequate capacity with actual or a high probability of property damage.

Improvements ordered by the Environmental Protection Agency (EPA) in the

form of NPDES Orders.

Major:

EPA recommendations, or, reduces a probable health and/or safety problem.

Moderate:

Rehabilitate to increase capacity to meet current needs.

Minimal:

New/Expansion to meet a specific development proposal.

No Impact:

New/Expansion to meet future or projected needs.

#### WATER PUMP STATIONS

Extremely Critical:

Structurally deficient. Deterioration has already caused a safety hazard to the

public, or, EPA orders in the form of a consent decree, findings and orders or

court order.

Critical:

Inadequate capacity with the inability to maintain pressure required for fire flows.

Major:

Replace due to inadequate capacity or EPA recommendations.

Moderate:		Rehabilitate to increase capacity to meet current needs.			
Minimal:		New/Expansion to meet a specific development proposal.			
No Impact:		New/Expansion to meet future or projected needs.			
WATER LIN	VES/WA	ATER TOWERS			
Extremely C	ritical:	Solve low water pressure or excessive incidents of main breaks in project area.			
Critical:		Replace, due to deficiency such as excessive corrosion, etc.			
Major:		Replace undersized water lines as upgrading process.			
Moderate:		Increase capacity to meet current needs.			
Minimal:		New/Expansion project to meet a specific development proposal.			
No Impact:		New/Expansion to meet future or projected needs.			
<u>OTHER</u>					
Extremely Cr	itical:	There is a present health and/or safety threat.			
Critical:		The project will provide immediate health and/or safety benefit.			
Major:		The project will reduce a probable health and/or safety problem.			
Moderate:		The project will delay a health and/or safety problem.			
Minimal:		A possible future health and/or safety problem mitigation.			
No Impact:		No health and/or safety effect.			
NOTE:	in the o	ned projects that can be rated in more than one subset may be rated other category at the discretion of the District 5 Executive Committee. eral, the majority of the cost or scope of the project shall determine the category which the project will be scored.			
(Submittals v	vithout s	supporting documentation will receive 0 Points for this question.)			
Extremely Cr	itical	_, Critical X, Major, Moderate, Minimal, No Impact Explain

<del>!</del> }	<u> 11294</u>	a jetter of the OLIT			

(Additional narrative, charts and/or pictures should be attached to questionnaire)

4.	Identify the amount of local funds that will be used on the project as a percentage of the total project cost.
	A.) Amount of Local Funds = \$\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\
	RATIO OF LOCAL FUNDS DIVIDED by TOTAL PROJECT COSTS (A□B)=%
	Note: Local funds should be considered funds derived from the applicant budget or loans funds to be
	paid back through local budget, assessments, rates or tax revenues collected by the applicant.
5.	Identify the amount of other funding sources to be used on the project, excluding State Issue II or LTIP
	Funds, as a percentage of the total project cost.
	Grants% Gifts%, Contributions 45 %
	Other% (explain), Total%
	Note: Grant funds and other revenues not contributed or collected through taxes by the applicant
	should be considered other funds. The Scope of Work for each Funding Source must be the same.
6.	Total Amount of SCIP and Loan Funding Requested- An Applicant can request a grant per the categories below for points as indicated on the Priority Rating Sheet. If the Applicant is including a loan request equal to, but not exceeding 50% of the OPWC funding amounts listed below, there will be no point penalty. If loan funds requested are more than 50%, points as listed in the Priority Rating Sheet will apply.
	\$500,001 or More \$400,001-\$500,000 \$325,001-\$400,000 \$275,001-\$325,000 \$175,001-\$275,000 \$175,000 or Less
	There are times when the District spends all of the grant money and has loan money remaining. When this happens, the district makes a loan offer in the amount of the requested grant to the communities that were not funded. The offers are made in the order of scoring. We need to know if you are not successful in obtaining grant dollars for your project if you would be interested in loan money:
	YES NOX
7.	If the proposed project is funded, will its completion directly result in the creation of permanent full-time

equivalent (FTE) jobs (FTE jobs shall be defined as 35 hours/week)? Yes No If yes, how
many jobs within eighteen months? Will the completed project retain jobs that would otherwise be
permanently lost? Yes No _X . If yes, how many jobs will be created/retrained within 18
months following the completion of the improvements?
(Supporting documentation in the form of letter from affected industrial or commercial enterprises that
specify full time equivlent jobs that will be retained or created directly by the installation or
improvement of Public infrastructure. Additional items such as; 1) newspaper articles or other media
news accounts, 2) public meeting minutes, and/or 3) a letter from the County Economic Development
Director or State of Ohio Economic Development Professional that alludes to the requirement for the
infrastructure improvement to support the business. Submittals without supporting documentation will
receive 0 points for this question.)

- 8. What is the total number of existing users that will directly benefit from the proposed project if completed? 340 (Use households served, traffic counts, etc. and explain the basis by which you arrived at your number.)
- Is subdivision's population less than 5,000 Yes \_\_\_ No 9. If yes, continue. You may want to design your project per Small Government Project Evaluation Criteria, released for the current OPWC Round to assist in evaluating your project for potential Small Government Funding. The Small Government Criteria is available on the OPWC website at http://www.pwc.state.oh.us/Meth.SG.PDF If No, skip to Question 11.

#### 10. OHIO PUBLIC WORKS COMMISSION SMALL GOVERNMENT PROGRAM **GUIDELINES**

All projects that are sponsored by a subdivision with a population of 5,000 or less, and not earning enough points for District Funding from SCIP or LTIP Funds, are then rated using the Small Government Program Rating Criteria for the corresponding funding round. In order to be rated the entity must submit the Small Government Suppliment and their required budgets with their application. Only infrastructure that is village- or township- owned is eligible for assistance. The following policies have been adopted by the Small Government Commission:

- •District Integrating Committees may submit up to seven (7) applications for consideration by the Commission. All 7 must be ranked, however, only the top five (5) will be scored. The remaining two (2) will be held as contingency projects should an application be withdrawn.
- •Grants are limited to \$500,000. Any assistance above that amount must be in the form of a loan.

- Grants for new or expanded infrastructure cannot exceed 50% of the project estimate.
- The Commission may deny funding for water and sewer systems that are deemed to be more cost-effective if regionalized.
- If a water or sewer project is determined to be affordable, the project will be offered a loan rather than a grant. Pay special attention to the Water & Wastewater Affordability Supplemental and the Small Government Water & Wastewater Affordability Calculation Worksheet. Both are available on the Small Government Program Tab at <a href="http://www.pwc.state.oh.us/SmallGovernment.html">http://www.pwc.state.oh.us/SmallGovernment.html</a>
- Should there be more projects that meet the "annual score" than there is funding, the tie breaker is those projects which scored highest under Health & Safety, with the second tie breaker being Condition. If multiple projects have equivalent Health & Safety and Condition scores they are arranged according to the amount of assistance from low to high. Once the funded projects are announced, "contingency protects" may be funded from project under-runs by continuing down the approved project list.
- Supplemental assistance is not provided to projects previously funded by the Commission.
- •Applicants have 30 days from receipt of application by OPWC without exception to provide additional documentation to make the application more competitive under the Small Government criteria. Applications will be scored after the 30-day period has expired. The applicants for each District's two (2) contingency projects will have the same 30-day period to submit supplemental information but these applications will not be scored unless necessary to do so. It is each applicant's responsibility for determining the need for supplemental material. The applicant will not be asked for or notified of missing information unless the Commission has changed the project type and it affects the documentation required. Important information may include, but is not limited to: age of infrastructure, traffic counts or utility users, median income information, user rates ordinances, and the Auditor's Certificate of Estimated Revenues or documentation from the Auditor of State that subdivision is in a state of fiscal emergency.

If you desire to have your Round 33 project considered for Small Government Funding please download the Small Government Evaluation Criteria applicable to Round 33 by accessing the OPWC Website at <a href="http://www.pwc.state.oh.us/Meth.SG.PDF">http://www.pwc.state.oh.us/Meth.SG.PDF</a>. Please complete the Small Government Evaluation Criteria and attach all required supporting documentation and attach it to the District 5 Questionnaire for Round 32.

<sup>\*</sup> Applicants must certify local share contribution. Specify, all funding sources to be utilized as local share at the time of application submittal.

Ohio Public Works Commission

# Small Government Capital Improvements Program

PY 34 Methodology - Rating Scales

Approved July 18, 2019

Score  $\frac{61}{2}$ 

Ohio Public Works Commission 65 East State Street, Suite 312 Columbus, Ohio 43215 614.466.0880 http://www.pwc.ohio.gov Complete and compliant support documentation must be provided for a criterion to be awarded points. See Applicant Manual for more information.

- 1. Ability and Effort of the Applicant to Finance the Project (Maximum 10 points)
  - A. Roads, Bridges/Culverts, Storm Water, Solid Waste Projects Only "Auditor's Certificate of Estimated Resources" showing fund detail, as provided in ORC sections 5705.35 and 5705.36 is used to determine potential financial resources available for the project. Score is based on the project's total cost as a percentage of financial resources.
    - Total project cost represents 0 to 20% of subdivision's total combined funds legally eligible for infrastructure type
    - Total project cost represents 21 to 40% of subdivision's total combined funds legally eligible for infrastructure type
    - Total project cost represents 41 to 60% of subdivision's total combined funds legally eligible for infrastructure type
    - Total project cost represents 61 to 80% of subdivision's total combined funds legally eligible for infrastructure type
    - Total project cost represents 81 to 100% of subdivision's total combined funds legally eligible for infrastructure type
    - Total project cost exceeds 100% of subdivision's total combined funds legally eligible for infrastructure type, or subdivision is in fiscal emergency
  - B. Water and Wastewater Projects Only Determined by SG Administrator according to the Water & Wastewater Ability & Effort calculation described in Applicants Manual. Information is obtained from both water and wastewater rate ordinances, Small Government Water & Wastewater Ability & Effort Supplemental, and data from the U.S. Census Bureau's American Fact Finder web application. Points are provided for the hours worked to pay for water and wastewater services according to the highest of two variances as a percentage above or below State Averages: weighted average of household income or percentage of households making less than \$25,000.
    - 0 More than 50% above state average
    - 2 25.1% 50% above state average
    - 4 0 25% above state average
    - 6 0.1% 25% below state average
    - 8 25.1% to 50% below state average
    - 10 More than 50% below state average
- 2. Importance of Project to Health and Safety of Citizens Score is assigned according to the application project description and any pertinent supplemental documentation. (Maximum 10 points)
  - A. Road, Bridge, Culvert
    - New infrastructure to meet future or projected needs
    - New infrastructure to meet current needs; Roadway surface paving less than 2 inches; Bridges with General Appraisal of 6 or above or with a Sufficiency Rating of 81-100

- 4 Roadway surface paving equal to or greater than 2 inches with/without milling; Replace or install signal where warranted; Bridges with a General Appraisal of 5 or Sufficiency Rating of 66-80; Culvert replacement with no associated damage
- Road widening to add paved shoulders or for safe passage, and/or roadway paving with full-depth base repair equal to or greater than 5% of roadway surface area; Intersection improvement to add turn lanes or realignment; Bridges with a General Appraisal of 4 or Sufficiency Rating of 51-65; Culverts with inadequate flow capacity
- Complete roadway full-depth reconstruction (includes removal/replacement of base) or reclamation with/without drainage; Widening to add travel lanes; Intersection improvements to address excessive accident rate and/or inadequate level of service with Crash Reduction Factor (0.0 < CRF < 0.2); Bridges with a General Appraisal of 3 or Sufficiency Rating of 26-50; Culverts with inadequate flow capacity and property damage (i.e. flooding)
- Complete roadway reconstruction or reclamation with/without drainage with widening to add travel lanes; Intersection improvement to address excessive accident rate and/or inadequate level of service with Crash Reduction Factor (CRF >= 0.2); Bridges with General Appraisal of 2 or less, or Sufficiency Rating of less than 26; Culverts that are structurally deficient
- B. Water, Wastewater, Storm Water, Solid Waste
  - 0 Infrastructure to meet future or projected needs
  - 2 Expanded infrastructure to meet specific development proposal
  - Infrastructure to meet current needs; Update processes to improve effluent or water quality; To remain in compliance with permit due to increased standards; Increase storm sewer capacity in which there is no associated land damage; Increase sanitary sewer capacity; Replace water meters as part of an upgrade
  - OEPA recommendations; District health board recommendations; Increase storm sewer capacity that has associated land damage; Replace undersized waterlines as part of upgrade; Install new meters or replace meters that have exceeded useful life
  - Replacement of storm or sanitary sewers due to chronic flooding, back-up, or property damage; Inflow and/or Infiltration; Inadequate capacity to maintain pressure required for fire flows; Replacement of waterlines or towers due to excessive corrosion
  - OEPA Findings & Orders, OEPA orders contained in permit, Consent Decree or Court Order; Structural separations (CSOs)Age and Condition of System to be repaired or replaced. This is a two-part criterion. (Maximum 10 points)

#### 3. Age & Condition of System to be repaired or replaced

Part I – Age: This uses provided documentation for existing infrastructure. Documentation pertains to source documentation or from a compliant letter written by an eligible local official who can vouch for the time period during his/her term in office. If no documentation the default score is 1 point. (Maximum 5 points)

Life	20	30	50
Project Type Points	Road	Wastewater	Bridge/Culvert. Sanitary Sewer, Water, Storm Water, Solid Waste
0	New / Expansion	New / Expansion	New / Expansion
1	2014-2019	2011-2019	2004-2019
2	2009-2013	2004-2010	1993-2003
3	2004-2008	1996-2003	1981-1992
4	1999-2003	1989-1995	1969-1980
(5)	1998 or before	1988 or before	1968 or before

Part II - Condition (Maximum 5 points)

- New/Expansion: New or expansion project components represent at least 50% of improvements
- 2 Expansion: New or expansion project components represent between 25% and 49% of improvements
- Poor: Infrastructure requires repair to continue functioning as originally intended and/or upgrade to meet current design standards.
- Critical: Infrastructure requires replacement to continue functioning as originally intended.
- 5 Failed: Not functioning
- 4. Leveraging Ratio Local and all non-OPWC funding sources as a percentage of total funding. (Maximum 10 points)

	Repair/Replacement	New/Expansion
	(Poor/Critical/Failed	(New/Expansion &/or
	in Criterion 3)	Expansion in Criterion 3)
0	10 or less	50 or less
1	11-15	51-55
2	16-20	56-60
3	21-25	61-65
4	26-30	66-70
5	31-35	71-75
6	36-40	76-80
(7)	41-45	81-85
(7) 8	46-50	86-90
9	51-55	91-95
10	56 or more	96 or more

5.	Population B applicant's to	Benefit – Number of those to benefit directly from the improvement as a percentage of stal population. (Maximum 5 points)	
	0	10% or less	
	1	25% - 11%	
		35% - 26%	
	3	45% - 36%	
	2 3 4	55% - 46%	
	(5)	56% or more	
6.	District Prior	rity Ranking as provided by District (Maximum 10 points)	
	6	5th ranked district project	
	7	4th ranked district project	
	8	3 <sup>rd</sup> ranked district project	
	9	2 <sup>nd</sup> ranked district project	
	10	1st ranked district project	
7.	Amount of O	PWC funding requested (Maximum 10 points)	
	0	\$500,000 or more	
	5	\$250,000 - \$499,999	
	10	249,999 or less	
8.	Loan Request	t as a percentage of OPWC assistance (Maximum 10 points)	
	1	15 - 29% of OPWC assistance	
	5	30 - 49% of OPWC assistance	
	(10)	50 - 100% of OPWC assistance	
9.	Useful Life of	Project - Taken from engineer's useful life statement. (Maximum 5 points)	
	1	7 - 9 years	
	2	10 - 14 years	
	3	15 - 19 years	
	4	20 - 24 years	
	(5)	25 years or more	
10.	from the most	ehold Income – Applicant's MHI as a percentage of the statewide MHI. Information derived recent 5-year American Community Survey as published by the Ohio Development Services cimum 10 points)	and the same of th
	2	110% or more	٠, '
	2	110% or more 100% - 109%	10 1
	4	90% - 99%

	(10)	79% or less	
	(10)	7976 OF ICSS	

### 11. Readiness to Proceed (Maximum 10 points)

Part I – Status of Plans – This uses the Small Government Commission's Engineer's Plan Status Certification. (Maximum 5 points)

- 0 Plans not yet begun
- 2 Surveying through Preliminary Design Completed (Items A-C)
  - Surveying through final construction plans, and secured permits and right-of-way as appropriate (Items A-H)

Part II – Status of Funding Sources – This uses source documentation including CFO certifications and loan letters. (Maximum 5 points)

- 0 All funds not yet committed
- 3 Applications submitted to funding entities
- 5 All funding committed
