1.3 Availability of Local Funds

Attach a statement signed by the <u>Chief Financial Officer</u> listed in section 5.2 certifying <u>all local resources</u> required for the project will be available on or before the earliest date listed in the Project Schedule section. The OPWC Agreement will not be released until the local resources are certified. Failure to meet local share may result in termination of the project. Applicant needs to provide written confirmation for funds coming from other funding sources.

6.0 Attachments / Completeness review

Confirm in the boxes below that each item listed is attached (Check each box) A certified copy of the legislation by the governing body of the applicant authorizing a designated **|** official to sign and submit this application and execute contracts. This individual should sign under 7.0, Applicant Certification, below. A certification signed by the applicant's chief financial officer stating the amount of all local share 1 funds required for the project will be available on or before the dates listed in the Project Schedule section. If the application involves a request for loan (RLP or SCIP), a certification signed by the CFO which identifies a specific revenue source for repaying the loan also must be attached. Both certifications can be accomplished in the same letter. A registered professional engineer's detailed cost estimate and useful life statement, as required in **|√**| 164-1-13, 164-1-14, and 164-1-16 of the Ohio Administrative Code. Estimates shall contain an engineer's seal or stamp and signature. A cooperative agreement (if the project involves more than one subdivision or district) which identifies the fiscal and administrative responsibilities of each participant. Farmland Preservation Review - The Governor's Executive Order 98-IIV, "Ohio Farmland Protection Policy" requires the Commission to establish auidelines on how it will take protection of productive agricultural and grazing land into account in its funding decision making process. Please include a Farm Land Preservation statement for projects that have an impact on farmland. Capital Improvements Report, CIR Required by O.R.C. Chapter 164,06 on standard form. Supporting Documentation: Materials such as additional project description, photographs, economic impact (temporary and/or full time jobs likely to be created as a result of the project), accident reports, impact on school zones, and other information to assist your district committee in ranking your project. Be sure to include supplements which may be required by your local District Public Works Integrating Committee,

7.0 Applicant Certification

The undersigned certifies: (1) he/she is legally authorized to request and accept financial assistance from the Ohio Public Works Commission as identified in the attached legislation; (2) to the best of his/her knowledge and belief, all representations that are part of this application are true and correct; (3) all official documents and commitments of the applicant that are part of this application have been duly authorized by the governing body of the applicant; and, (4) should the requested financial assistance be provided, that in the execution of this project, the applicant will comply with all assurances required by Ohio Law, including those involving Buy Ohio and prevailing wages.

Applicant certifies that physical construction on the project as defined in the application has NOT begun, and will not begin until a Project Agreement for this project has been executed with the Ohio Public Works Commission. Action to the contrary will result in termination of the agreement and withdrawal of Ohio Public Works Commission funding from the project.

RIDENOUR ROAD WIDENING & PAVING PROJECT [North of Scott Road] RESOLUTION 2019-0828

AUTHORIZING LEGISLATION

A RESOLUTION AUTHORIZING *FARMER TOWNSHIP* TO PREPARE AND SUBMIT AN APPLICATION TO PARTICIPATE IN THE OHIO PUBLIC WORKS COMMISSION STATE CAPITAL IMPROVEMENT AND / OR LOAL TRANSPORTATION IMPROVEMENT PROGRAM(S) AND TO EXECUTE CONTRACTS AS REQUIRED

WHEREAS, the State Capital Improvement Program and the Local Transportation Improvement Program both provide financial assistance to political subdivisions for capital improvements to public infrastructure, and

WHEREAS, The Board of Trustees of Farmer Township is planning to make capital improvements to Ridenour Road Widening & Paving Project (North of Scott Road), and

WHEREAS, the infrastructure improvement herein above described is considered to be a priority need for the community and is a qualified project under the OPWC programs,

NOW THEREFORE, BE IT RESOLVED by the Board of Trustees of Farmer Township:

Section 1: Jennifer Mavis, Farmer Township Fiscal Officer, is hereby authorized to apply to the OPWC for funds as described above.

Section 2: Jon Timbrook, Current President of the Farmer Township Board of Trustees, is authorized to enter into any agreements as may be necessary and appropriate for obtaining this financial assistance.

Passed: August 28, 2019

Jop Timbrook, Board President

Jennifer Mavis, Fiscal Officer

DEFIANCE COUNTY

CHIEF FINANCIAL OFFICER'S CERTIFICATION

I, Jennifer Mavis, Fiscal Officer, Farmer Township, Defiance County, Ohio hereby certify that Farmer Township has the required local share for the proposed **Ridenour Road Widening and Paving** project or is in the process of collecting such funds and that such funds will be appropriated to the Farmer Township budget to pay the local share for the 2019 State Capital Improvement Program project in the amount of \$73,000 for which funding is requested from the Ohio Public Works Commission.

Jemifer Mavis

Fiscal Officer

DISTRICT 5 **CAPITAL IMPROVEMENT PROJECTS** OHESTIONNAIDE

		ROUND 34
	e of Applicant: <u>Defiance C</u>	
Proje	ct Title: <u>Ridenour Road Pav</u>	ing and Widening
Proje respo	cts. Please provide specific i	answered for each application submitted for State Issue II SCIP, LTIP and Loan information using the best documentation available to you. Justification of your precipe required if your project is selected for funding, so please provide correct and
1.	What percentage of the pro	oject in repair A= 100 %, replacement B=%, expansion C=%, and new D=
	%? (Use dollar amo	ounts of project to figure percentages and make sure the total equals one
	hundred(100) percent) A+	B=% C+D=%
		air or Replacement of public facilities owned by the government (any subdivision ne state).
		lacement of privately owned wells, septic systems, private water or wastewater ems, etc.
2.	Give the physical condition	n rating from the Capital Improvements Report (CIR) Inventory:
	Closed or Not Operating:	The condition is unusable, dangerous and unsafe. The primary components have failed. The infrastructure is not functioning at all.
	Critical:	The condition is causing or contributing to a serious non-compliance situation and is threatening the intended design level of service. The infrastructure is functioning at seriously diminished capacity. Imminent failure is anticipated within 18 months. Repair and/or replacement is required to eliminate the critical condition and meet current design standards. (For Road Projects structural repair items would represent a minimum of 25% of the total Project Cost).
	Poor:	The condition is substandard and requires repair/replacement in order to return to the intended level of service and comply with current design

Fair:

The condition is average, not good or poor. The infrastructure is still functioning as originally intended. Minor deficiencies exist requiring repair to continue to function as originally intended and/or to meet current design

standards. Infrastructure contains a major deficiency and is functioning at a

standards.

diminished capacity.

Good:

The condition is safe and suitable to purpose. Infrastructure is functioning as

originally intended, but requires minor repairs and/or upgrades to meet

current design standards.

Excellent: The condition is new, or requires no repair. Or, no supporting documentation

has been submitted.

The CIR must be included with the application in order to receive points along with supporting documentation (e.g. photos or a narrative) justifying the rating.

3. If the proposed project is not approved what category would best represent the impact on the general health and/or public safety?

ROADS

Extremely Critical: Resurfacing, Restoration, Rehabilitation and Reconstruction (4R) of a Major

Access Road.*

Critical: Resurfacing, Restoration and Rehabilitation (3R) of a Major Access Road.*

Major: Resurfacing, Restoration, Rehabilitation and Reconstruction (4R) of a Minor

Access Road.*

Moderate: Resurfacing, Restoration and Rehabilitation (3R) of a Minor Access Road.*

Minimal: Preventative Maintenance of a Major Access Road.

No Impact: Preventative Maintenance of a Minor Access Road.

Projects that have a variety of work will be scored in the LOWEST category of work contained in the Construction Estimate.

Road/Street Classifications:

Major Access Road: Roads or streets that have a dual function of providing

access to adjacent properties and providing through or

connecting service between other roads.

Minor Access Road: Roads or streets that primarily provide access to adjacent

properties without through continuity, such as cul-de-sacs

or loop roads or streets.

Preventative Maintenance: Non Structural Pavement work such as chip sealing, cape

sealing, microsurfacing, crack sealing, etc.

^{*(3}R) Resurfacing, Restoration and Rehabilitation - Improvements to existing roadways, which have as their main purpose, the restoration of the physical features (pavement, curb, guardrail, etc.) without altering the original design elements.

^{*(4}R) Resurfacing, Restoration, Rehabilitation and Reconstruction - Much like 3R, except that 4R allows for the complete reconstruction of the roadway and alteration of certain design elements (i.e., lane widths, shoulder width, SSD, etc.).

BRIDGES SUFFICIENCY RATING

Extremely Critical: 0-25, or a General Appraisal rating of 3 or less.

Critical: 27-50, or a General Appraisal rating of 4.

Major: 51-65 or a General Appraisal rating of 5 or 6.

Moderate: 66-80 or a General Appraisal rating of 7.

Minimal: 81-100 or a General Appraisal rating of more than 7.

No Impact: Bridge on a new roadway.

WASTEWATER TREATMENT PLANTS

Extremely Critical: Environmental Protection Agency (EPA) orders in the form of a consent decree,

findings and orders or court order. Health Department Construction Ban.

Critical: Improvements ordered by the Environmental Protection Agency (EPA) in the

form of NPDES Orders.

Major: Replace deficient appurtenances. Update existing processes due to EPA

recommendations.

Moderate: Increase capacity to meet current needs or update processes to improve effluent

quality.

Minimal: New/Expansion project to meet a specific development proposal.

No Impact: New/Expansion to meet future or projected needs.

WATER TREATMENT PLANT

Extremely Critical: EPA orders in the form of a consent decree, findings and orders or court order.

Critical: Improvements to meet Environmental Protection Agency (EPA) Safe Drinking

Water Regulations and/or NPDES Orders.

Major: Replace deficient appurtenances. Update existing processes due to EPA

recommendations.

Moderate: Increase capacity to meet current needs or update processes to improve water

quality.

Minimal: New/Expansion project to meet a specific development proposal.

No Impact: New/Expansion to meet future or projected needs.

<u>COMBINED SEWER SEPARATIONS</u> (May be construction of either new storm or sanitary sewer as long as the result is two separate sewer systems.)

Extremely Critical: EPA orders in the form of a consent decree, findings and orders or court order.

Health Department Construction Ban.

Critical: Separate, due to chronic backup or flooding in basements.

Major: Separate, due to documented water quality impairment, or due to EPA

recommendations.

Moderate: Separate, due to specific development proposal within or upstream of the

combined system area.

Minimal: Separate, to conform to current design standards.

No Impact: No positive health effect.

STORM SEWERS

Extremely Critical: EPA orders in the form of a consent decree, findings and orders or court order.

Critical: Chronic flooding (structure damage).

Major: Inadequate capacity (land damage).

Moderate: Inadequate capacity with no associated damage.

Minimal: New/Expansion to meet current needs.

No Impact: New/Expansion to meet future or project needs.

CULVERTS

Extremely Critical: Structurally deficient or functionally obsolete. Deterioration has already caused a

safety Critical: hazard to the public.

Critical: Inadequate capacity with land damage and the existing or high probability of

property damage.

Major: Inadequate capacity (land damage).

Moderate: Inadequate capacity with no associated damage.

Minimal: New/Expansion to meet current needs.

No Impact: New/Expansion to meet future or projected needs.

SANITARY SEWERS

Extremely Critical: EPA orders in the form of a consent decree, findings and orders or court order.

Health Department Construction Ban.

Critical: Replace, due to chronic pipe failure, chronic backup or flooding in basements.

Improvements ordered by the Environmental Protection Agency (EPA) in the

form of NPDES Orders.

Major: Replace, due to inadequate capacity or infiltration, or due to EPA

recommendations.

Moderate: Rehabilitate to increase capacity to meet current needs or to reduce inflow and

infiltration.

Minimal: New/Expansion project to meet a specific development proposal.

No Impact: New/Expansion to meet future or projected needs.

SANITARY LIFT STATIONS AND FORCE MAINS

Extremely Critical: Structurally deficient. Deterioration has already caused a safety/health hazard to

the public, or, EPA orders in the form of a consent decree, findings and orders or

court order.

Critical: Inadequate capacity with actual or a high probability of property damage.

Improvements ordered by the Environmental Protection Agency (EPA) in the

form of NPDES Orders.

Major: EPA recommendations, or, reduces a probable health and/or safety problem.

Moderate: Rehabilitate to increase capacity to meet current needs.

Minimal: New/Expansion to meet a specific development proposal.

No Impact: New/Expansion to meet future or projected needs.

WATER PUMP STATIONS

Extremely Critical: Structurally deficient. Deterioration has already caused a safety hazard to the

public, or, EPA orders in the form of a consent decree, findings and orders or

court order.

Critical: Inadequate capacity with the inability to maintain pressure required for fire flows.

Major: Replace due to inadequate capacity or EPA recommendations.

Moderate: Rehabilitate to increase capacity to meet current needs.

Minimal:	New/Expansion to meet a specific development proposal.							
No Impact:	New/Expansion to meet future or projected needs.							
WATER LIN	ES/WATER TOWERS							
Extremely Cri	itical: Solve low water pressure or excessive incidents of main breaks in project area.							
Critical:	Replace, due to deficiency such as excessive corrosion, etc.							
Major:	Replace undersized water lines as upgrading process.							
Moderate:	Increase capacity to meet current needs.							
Minimal:	New/Expansion project to meet a specific development proposal.							
No Impact:	New/Expansion to meet future or projected needs.							
<u>OTHER</u>								
Extremely Cri	tical: There is a present health and/or safety threat.							
Critical:	The project will provide immediate health and/or safety benefit.							
Major:	The project will reduce a probable health and/or safety problem.							
Moderate:	The project will delay a health and/or safety problem.							
Minimal:	A possible future health and/or safety problem mitigation.							
No Impact:	No health and/or safety effect.							
NOTE: Combined projects that can be rated in more than one subset may be rated in the other category at the discretion of the District 5 Executive Committee. In general, the majority of the cost or scope of the project shall determine the category under which the project will be scored.								
(Submittals v	vithout supporting documentation will receive 0 Points for this question.)							
Extremely Cr	ritical X_, Critical, Major, Moderate, Minimal, No Impact Explain							
your answer.								

(Additional narrative, charts and/or pictures should be attached to questionnaire)

4.	Identify the amount of local funds that will be used on the project as a percentage of the total project cost.
	A.) Amount of Local Funds = \$\frac{73,000}{}
	B.) Total Project Cost = \$\(\frac{234,320}{}\)
	RATIO OF LOCAL FUNDS DIVIDED by TOTAL PROJECT COSTS (A B)= 31 %
	Note: Local funds should be considered funds derived from the applicant budget or loans funds to be
	paid back through local budget, assessments, rates or tax revenues collected by the applicant.
5.	Identify the amount of other funding sources to be used on the project, excluding State Issue II or LTIP
	Funds, as a percentage of the total project cost.
	Grants% Gifts%, Contributions%
	Other% (explain), Total%
	Note: Grant funds and other revenues not contributed or collected through taxes by the applicant
	should be considered other funds. The Scope of Work for each Funding Source must be the same.
6.	Total Amount of SCIP and Loan Funding Requested- An Applicant can request a grant per the categories below for points as indicated on the Priority Rating Sheet. If the Applicant is including a loan request equal to, but not exceeding 50% of the OPWC funding amounts listed below, there will be no point penalty. If loan funds requested are more than 50%, points as listed in the Priority Rating Sheet will apply.
	\$500,001 or More \$400,001-\$500,000 \$325,001-\$400,000 \$275,001-\$325,000 x \$175,001-\$275,000 \$175,000 or Less
	There are times when the District spends all of the grant money and has loan money remaining. When this happens, the district makes a loan offer in the amount of the requested grant to the communities that were not funded. The offers are made in the order of scoring. We need to know if you are not successful in obtaining grant dollars for your project if you would be interested in loan money:
	YES NO_X (This will only be considered if you are not funded with grant money and there is remaining loan money.) Please note: if you answer "no" you will not be contacted, only if you answer "yes" will an offer be made in the event that there is loan money remaining.
7.	If the proposed project is funded, will its completion directly result in the creation of permanent full-time
	equivalent (FTE) jobs (FTE jobs shall be defined as 35 hours/week)? Yes No _X If yes, how
	many jobs within eighteen months? Will the completed project retain jobs that would otherwise be

permanently lost? Yes ____ No ____. If yes, how many jobs ____ will be created/retrained within 18 months following the completion of the improvements?

(Supporting documentation in the form of letter from affected industrial or commercial enterprises that specify full time equivlent jobs that will be retained or created directly by the installation or improvement of Public infrastructure. Additional items such as; 1) newspaper articles or other media news accounts, 2) public meeting minutes, and/or 3) a letter from the County Economic Development Director or State of Ohio Economic Development Professional that alludes to the requirement for the infrastructure improvement to support the business. Submittals without supporting documentation will receive 0 points for this question.)

- 8. What is the total number of existing users that will directly benefit from the proposed project if completed? 500 (Use households served, traffic counts, etc. and explain the basis by which you arrived at your number.)
- 9. Is subdivision's population less than 5,000 Yes x No If yes, continue. You may want to design your project per Small Government Project Evaluation Criteria, released for the current OPWC Round to assist in evaluating your project for potential Small Government Funding. The Small Government Criteria is available on the OPWC website at http://www.pwc.state.oh.us/Meth.SG.PDF If No, skip to Question 11.

10. OHIO PUBLIC WORKS COMMISSION SMALL GOVERNMENT PROGRAM GUIDELINES

All projects that are sponsored by a subdivision with a population of 5,000 or less, and not earning enough points for District Funding from SCIP or LTIP Funds, are then rated using the Small Government Program Rating Criteria for the corresponding funding round. In order to be rated the entity must submit the Small Government Suppliment and their required budgets with their application. Only infrastructure that is village- or township- owned is eligible for assistance. The following policies have been adopted by the Small Government Commission:

- •District Integrating Committees may submit up to seven (7) applications for consideration by the Commission. All 7 must be ranked, however, only the top five (5) will be scored. The remaining two (2) will be held as contingency projects should an application be withdrawn.
- Grants are limited to \$500,000. Any assistance above that amount must be in the form of a loan.
 - •Grants for new or expanded infrastructure cannot exceed 50% of the project estimate.
- The Commission may deny funding for water and sewer systems that are deemed to be more

cost-effective if regionalized.

- •If a water or sewer project is determined to be affordable, the project will be offered a loan rather than a grant. Pay special attention to the Water & Wastewater Affordability Supplemental and the Small Government Water & Wastewater Affordability Calculation Worksheet. Both are available on the Small Government Program Tab at http://www.pwc.state.oh.us/SmallGovernment.html
- •Should there be more projects that meet the "annual score" than there is funding, the tie breaker is those projects which scored highest under Health & Safety, with the second tie breaker being Condition. If multiple projects have equivalent Health & Safety and Condition scores they are arranged according to the amount of assistance from low to high. Once the funded projects are announced, "contingency protects" may be funded from project under-runs by continuing down the approved project list.
- Supplemental assistance is not provided to projects previously funded by the Commission.
- •Applicants have 30 days from receipt of application by OPWC without exception to provide additional documentation to make the application more competitive under the Small Government criteria. Applications will be scored after the 30-day period has expired. The applicants for each District's two (2) contingency projects will have the same 30-day period to submit supplemental information but these applications will not be scored unless necessary to do so. It is each applicant's responsibility for determining the need for supplemental material. The applicant will not be asked for or notified of missing information unless the Commission has changed the project type and it affects the documentation required. Important information may include, but is not limited to: age of infrastructure, traffic counts or utility users, median income information, user rates ordinances, and the Auditor's Certificate of Estimated Revenues or documentation from the Auditor of State that subdivision is in a state of fiscal emergency.

If you desire to have your Round 28 project considered for Small Government Funding please download the Small Government Evaluation Criteria applicable to Round 28 by accessing the OPWC Website at http://www.pwc.state.oh.us/Meth.SG.PDF. Please complete the Small Government Evaluation Criteria and attach all required supporting documentation and attach it to the District 5 Questionnaire for Round 28.

NU-METRICS Traffic Analyzer Study Computer Generated Summary Report Route: RIDENOUR NORTH OF SCOTT Location: RIDENOUR NORTH OF SCOTT

A study of vehicle traffic was conducted with HI-STAR unit number 5573. The study was done in the SOUTH lane on RIDENOUR NORTH OF SCOTT in FARMER, OH in DEFIANCE county. The study began on 07/01/2019 at 10:00 AM and concluded on 07/02/2019 at 10:00 AM, lasting a total of 24 hours. Data was recorded in 60 minute time periods. The total recorded volume of traffic showed 254 vehicles passed through the location with a peak volume of 28 on 07/01/2019 at 06:00 PM and a minimum volume of 0 on 07/02/2019 at 12:00 AM. The AADT Count for this study was 254.

SPEED

Chart 1 lists the values of the speed bins and the total traffic volume for each bin.

	Chart 1														
[< 10	10	15	20	25	30	35	40	45	50	55	60	65	70	> 75
l	0	1	5	3	11	11	26	55	63	39	27	6	2	2	3

Half of the vehicles were traveling at 45 Mph or a lower speed. The average speed for all classified vehicles was 43 Mph with 5.12 percent exceeding the posted speed of 55 Mph. The HI-STAR found 5.12 percent of the total vehicles were traveling in excess of 55 Mph. The mode speed for this traffic study was 45 Mph and the 85th percentile was 50.85 Mph.

CLASSIFICATION

Chart 2 lists the values of the eight classification bins and the total traffic volume accumulated for each bin.

V			Cha	art 2			
< 21	21	28	40	50	60	70	> 80
215	19	15	5	0	0	0	0

Most of the vehicles classified during the study were Passenger Cars. The number of Passenger Cars in the study was 234 which represents 92.10 percent of the total classified vehicles. The number of Small Trucks in the study was 15 which represents 5.90 percent of the total classified vehicles. The number of Trucks/Busses in the study was 5 which represents 2.00 percent of the total classified vehicles. The number of Tractor Trailers in the study was 0 which represents 0.00 percent of the total classified vehicles.

HEADWAY

During the peak time period, on 07/01/2019 at 06:00 PM the average headway between the vehicles was 124.14 seconds. The slowest traffic period was on 07/02/2019 at 12:00 AM. During this slowest period, the average headway was 3600.0 seconds.

WEATHER

The roadway surface temperature over the period of the study varied between 83 and 136 degrees Fahrenheit. The HI-STAR determined that the roadway surface was Dry 100.00 percent of the time.

08/30/2019

NU-METRICS Traffic Analyzer Study Computer Generated Summary Report Route: RIDENOUR NORTH OF SCOTT Location: RIDENOUR NORTH OF SCOTT

A study of vehicle traffic was conducted with HI-STAR unit number 1891. The study was done in the NORTH lane on RIDENOUR NORTH OF SCOTT in FARMER, OH in DEFIANCE county. The study began on 07/01/2019 at 10:00 AM and concluded on 07/02/2019 at 10:00 AM, lasting a total of 24 hours. Data was recorded in 60 minute time periods. The total recorded volume of traffic showed 246 vehicles passed through the location with a peak volume of 26 on 07/01/2019 at 06:00 PM and a minimum volume of 0 on 07/02/2019 at 12:00 AM. The AADT Count for this study was 246.

SPEED

Chart 1 lists the values of the speed bins and the total traffic volume for each bin.

							Ch	art 1							
ı	< 10	10	15	20	25	30	35	40	45	50	55	60	65	70	> 75
	0	3	5	2	8	18	48	75	54	26	4	2	0	0	0

Half of the vehicles were traveling at 40 Mph or a lower speed. The average speed for all classified vehicles was 39 Mph with 0.82 percent exceeding the posted speed of 55 Mph. The HI-STAR found 0.82 percent of the total vehicles were traveling in excess of 55 Mph. The mode speed for this traffic study was 40 Mph and the 85th percentile was 45.06 Mph.

CLASSIFICATION

Chart 2 lists the values of the eight classification bins and the total traffic volume accumulated for each bin.

			Chart 2				
< 21	21	28	40	50	60	70	> 80
222	7	12	3	1	0	0	0

Most of the vehicles classified during the study were Passenger Cars. The number of Passenger Cars in the study was 229 which represents 93.50 percent of the total classified vehicles. The number of Small Trucks in the study was 12 which represents 4.90 percent of the total classified vehicles. The number of Trucks/Busses in the study was 3 which represents 1.20 percent of the total classified vehicles. The number of Tractor Trailers in the study was 1 which represents 0.40 percent of the total classified vehicles.

HEADWAY

During the peak time period, on 07/01/2019 at 06:00 PM the average headway between the vehicles was 133.33 seconds. The slowest traffic period was on 07/02/2019 at 12:00 AM. During this slowest period, the average headway was 3600.0 seconds.

WEATHER

The roadway surface temperature over the period of the study varied between 85 and 134 degrees Fahrenheit. The HI-STAR determined that the roadway surface was Dry 100.00 percent of the time.
